

June 29, 2022
EDWA Special Meeting
Agenda

1. Call to order
2. Roll Call
3. Public Comment—3 minute limit per person
4. Update:
5. Attorney Report
6. Engineering Report
7. EDWA Manager Report
8. Distribution Lead Report
9. Plant Manager Report
10. Malfunctioning finished turbidity meter. Has Hach submitted quote? Motion to purchase when quote is received. Note: the finished turbidity is not used to meet DEP requirement. The DEP requires EDWA to use the average of IFE to calculate CFE.
11. Discuss plan to separate stored chlorine cylinders by empty and filled bottles.
12. Materials to repair railing of clarifier will be purchased this week and work will be performed to alleviate safety concerns.
13. Discuss lack of DCED filings (DCED-CLGS-04). Required annually; hasn't been filed since 2014. Progress is being made to submit necessary filings to remediate. Estimated time frame is 30 days.
14. Method 334 implementation began on Saturday.
15. Discuss Outreach instructor from DEP Outreach Provider Program. Onsite visit is being scheduled. August 11, 2022 is the date scheduled for leak loss analysis.
16. Discuss School house road progress update. Has the sales rep found all the necessary parts yet? Note: manufacturing and logistical delays are quite extensive.
17. Fit testing is scheduled for July 1.
18. Discuss Lead and Copper survey. DEP denied the revision submitted in June 2022. Tracy is responding to the DEP questions. Our area lacks development and other things like apartment buildings, multi-family homes, and other structures which is complicating the issue. Samples were obtained 6-28-2022. Fairway Lab will pick up.
19. Discuss job descriptions and reorganization.
20. Motion to adjourn.
